

Sewer Service Agreement:

Applicant hereby makes application for wastewater at the above address and agrees to pay for said service according to the applicable rate and all Rules, Regulations, and Policies in effect.

Applicant agrees to permit authorized agents of East Sevier County Utility District free access to the premises for the purpose of inspecting, reading, repairing or removing property of ESCUD.

Applicant agrees to keep and maintain clear and accessible access to sewer tanks and pumps.

Applicant is responsible for any injury an ESCUD employee or contractor working on behalf of ESCUD incurs due to lack of negligence on maintaining proper access to property.

ESCUD shall have the right to inspect any installation before sewer/water service is introduced, or at any time and reserves the right to reject any plumbing/electrical not in accordance with ESCUD'S standards/policies. All sewer pumps and tanks must pass a final inspection before a Final Will Serve is given to obtain a Certificate of Occupancy.

Applicant is responsible for the proper operation of the septic pump and tank. Applicant understands that a valve has been installed in the water line between the water meter and the dwelling unit, which valve is under the sole control of ESCUD. In the event Applicant fails to pay any amount due ESCUD for a period of two months, ESCUD has the authority to terminate water service to the unit. Applicant agrees to this termination right and further agrees that ESCUD shall not be liable to anyone for any reason in the event water service is terminated as a result of Applicant's failure to pay for services pursuant to the terms of this Agreement.

Applicant agrees to pay all amounts owed to ESCUD for the services contemplated by this Agreement as well as for any repairs, maintenance, or other work requested by Applicant beyond what is covered by this Agreement.

I understand that it is the applicant's responsibility to have sewer tank pumped a minimum of once a year and may be required to pump once every 6 months if tank is under heavy use. This expense is solely on the applicant. Failure to maintain tank health that results in pump damage will be the sole expense of the applicant. ESCUD is not responsible for sewer pump if maintenance on tank is not maintained.

Applicant understands and agrees that absolutely no grinder, trash or any type of sewer pump is allowed without the sole approval of ESCUD. All sites with sewer pump and tank require a water only pump! Applicant will be held responsible for any and all damage our system sustains as a result of improper sewer tank installation. All sewer pumps must be inspected and approved by ESCUD or an approved ESCUD Contractor.

ESCUD will provide a copy of pump/tank installation requirements to applicants if needed and will be part of the agreement for all new construction.

I agree to only allow ESCUD, ESCUD approved contractors and pumping companies to repair, maintain or pump my sewer pump and tank.

I have read the above terms, and I understand the above terms, and I agree to abide by said terms.
